REGDATA® compliance assessment tool

Get early visibility on key regulatory changes impacting your products

Food News Monitoring System (FNMS) & Food Law Library (FLL)

Get the Regulatory news that matters – straight to your inbox

Food News Monitoring System (FNMS) monitors global regulatory requirements across diverse sources, formats, and languages. Stay updated with insights from food manufacturing websites, legislative sources, food safety authorities, and international organizations.

Set customized email alerts for news, recalls, and food safety updates relevant to your product portfolio and markets. Receive essential industry news and regulatory insights, helping you track evolving market trends, consumer concerns, and policy changes worldwide.

Access regulatory documentation

Use Food Law Library (FLL), our centralized repository to access food regulatory compliance documents that have critical impacts on your products. Our knowledge base provides unrivaled access to over 37,000 legal statutes governing regulatory compliance globally.

Specialized coverage:

- Dairy
- Alcoholic Beverages
- Confectionary, Bakery, Meat & More
- Cereals
- NEW categories: Supplements, Pet Food, Feeds, Cosmetics

1. Comply with international regulatory requirements.

Save legal and regulatory teams hundreds of hours of painstaking manual monitoring of laws and regulations.

“Trace One Regulatory Compliance has made different international regulations much more accessible and easier to understand. It has cut the time I spend on international reviews in half and has truly been a lifesaver. The customer service is also phenomenal and has gone out of their way to answer each and every one of our questions.”
IMBIBE INC.

2. Make thorough risk assessments.

Keep track of regulatory changes in existing markets, and provide the R&D, Production and Quality departments with advice on changing formulas, production processes, specifications and safety requirements.

3. Support new product development

Identify opportunities to source new product ideas for the R&D team, adapting to new or modified laws and policies.

“Trace One Regulatory Compliance is a very useful tool in supporting business both in new and already consolidated markets. You can obtain a lot of data that are important to make the right decision. The tool is a smart way to interact with all the interesting functions.”

CAMPARI

Get products to new markets faster

REGDATA®

1. Access the world's largest database of global substances

Get instant access to comprehensive, country-specific regulatory frameworks for additives, flavorings, pesticides, and more—all in one place. Empower your team with regulatory insights, bridging the gap between compliance and innovation.

2. Expedite regulatory compliance checks

• Assess Compliance in target markets

REGDATA® performs instant go/no-go assessments on product formulations, allowing users to effortlessly analyze regulated substances against global compliance requirements. Determine whether a product meets specific market standards and quickly communicate compliance status to product developers, quality management, and other key stakeholders.

• Identify the right market fit

Anticipate distribution challenges in evolving markets and accurately evaluate opportunities for business growth and expansion.

Substance database

80+ horizontal regulations covered across national and confederation levels.

1 million+ limits for additive usage in food categories.

900,000+ records on pesticide residues.

40,000+ conditions for flavoring regulations.

40,000+ limits related to veterinary drugs.

16,000+ limits for contaminants.

"I find the Trace One Regulatory Compliance tool very useful for complex legal queries (where the translation function is invaluable) and for easily tailored news feeds. The ability to share searches and notes with other team members is smart and efficient."

AB INBEV

Improve collaboration and accelerate knowledge transfer

✓ Easily collaborate across distributed teams with a unified up-to-date platform, make annotations, track changes and comments on the documents accessible for each team member.

✓ Standardize compliance assessments throughout the product lifecycle, providing marketing and quality assurance professionals with clear, actionable insights.

✓ Share with the team your saved searches across any of the areas: Substance Searches, Multiple markets and Compliance Assessment.

✓ Trace One Regulatory Compliance easily integrates with ERP and PLM systems to maintain and share all product-related data on a single, unified platform.

Stay ahead of food safety regulations and make compliance easy

Why you need Trace One Regulatory Compliance now:

- Mitigate financial and reputational risk of recalls of non-compliant products.
- Save up to 70%* of the time on all regulatory-related searches across different sources, formats, and languages across a regulatory team of employees globally.
- Save up to 50%* of the time to market for new product launches by cutting the cost of compliance.

Category leaders choose Trace One

- ✓ Trace One software supports over \$500 billion in food & beverage revenue per year.
- ✓ Seven of the top ten world's largest dairy producers use Trace One solutions.
- ✓ Half of the world's top ten confectionary giants use Trace One solutions.
